Mauricio Vasquez

Senior iOS Engineer

I have over 8 years of software development experience. I've specialized in iOS since 2013, working on different projects around the world. I've worked with American and European companies, and with very diverse teams on different timezones. I enjoy working with teams both as a developer, and/or as a team leader. I have experience working with different architectures such as MVVM, MVP, MVC, Clean Architecture. I always work using Continuous Integration, Unit Testing, and UI Testing.

WORK EXPERIENCE

Senior iOS Engineer Consultant

2019 – Present

Achievements/Tasks

- During this time I've worked as a consultant for a startup where I took the leading role. Some of my responsibilities were hiring, managing, programming, code review, and testing. I participated in major presentations where the company acquired their first round of investment.

Senior iOS Engineer Schibsted Media Group

2017 – 2019

Achievements/Tasks

- In this company, I mainly worked on two different projects: Segunda Mano, a major classified advertising platform in Mexico, and Rocket. Rocket was an ambitious project made to have one single code base for all classified apps in Schibsted. I collaborated with team of people from different parts of the world such as the UK, Spain, and Mexico.

iOS Engineer Consultant

2013 – 2017

Achievements/Tasks

- I've worked in different iOS projects since 2012 both employed and as a freelance developer. Most of my clients were located in the US and Mexico, but I've also worked with companies in Europe and South America.
